

TECHNICAL DATA SHEET

EVERROLL® MULTITILE

PRODUCT DESCRIPTION

CMS Danskin Acoustics everroll® Multitile is a 27mm thick resilient tile product, specifically designed for weight rooms. The tile offers an excellent level of shock absorption for weight-lifting areas and thoroughly protects the subfloor against mechanical damages from dumbbells or free-weights falling down onto the floor. The increased impact sound improvement rating is a welcome side-effect. This provides athletes with a cushioning but solid floor, suitable for a variety of fitness and weight training exercises and equipment.

SPECIAL PROPERTIES AND BENEFITS

- Easy on the joints during general fitness training, extraordinary force reduction rating
- Thoroughly protects subfloors
- Extremely impact sound and shock absorbent
- Impact resistance exceeds industry standard
- Slip resistant
- Suitable for underfloor heating
- Good colour fastness
- Easy installation
- No troublesome light reflections

TECHNICAL DATA*

Material composition	PUR bonded and moulded rubber tile with a 4mm everroll® compact top layer
Thickness	27mm (23mm black base layer + 4mm everroll® compact top layer)
Dimensions of tile	1,000 x 500mm including “appearance joint” for square design
Force reduction	everroll® Multitile offers an excellent force reduction rating: approximately 38.5% The force reduction rating is expressed as a relative percentage (bare concrete slab = 0% force reduction) of the force that is not reflected when applied to a resilient surface. The higher the force reduction rating, the more “forgiving” the surface
Impact resistance	21 Nm This impact resistance rating exceeds the universally applicable minimum requirement for sports floorings of 8 Nm quite considerably
Gloss level	0.0 - 0.3 GU (Gloss Unit) in “edition 4.0”
Impact sound improvement rating (dLw)	> 21 dB
