

Regupol®

TECHNICAL DATA SHEET

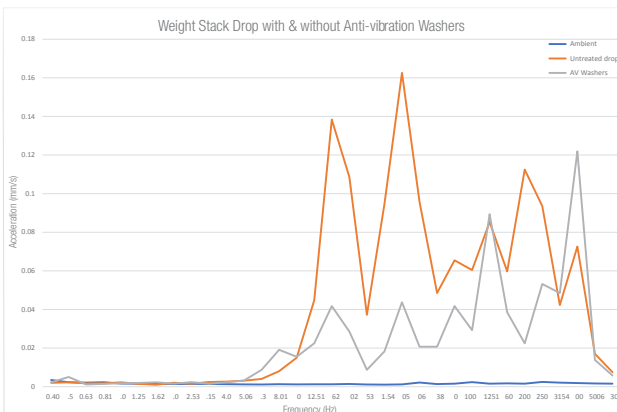

RESISTANCE MACHINE IMPACT WASHERS

PRODUCT DESCRIPTION

Regupol® Resistance Machine Impact Washers are manufactured from two different density materials laminated together and specifically designed to reduce impact at source from the weight stacks of resistance machines to greatly reduce the noise generated. By reducing the impact, this can prolong the life of the equipment and can aid in the reduction of reverberated noise levels.

PHYSICAL INFORMATION

Washer diameter	M20
Washer thickness	25mm
Available in packs of	2

BENEFITS

- Dual laminated system designed to reduce noise and improve damping
- Very easy to fit
- Hard wearing

IMPORTANT: Directions for use are given for guidance only and are not intended to form part of any contract. They should be varied or adapted to suit your particular materials or conditions of use. Goods supplied by the company are made to approved standards from the highest quality raw materials but no warranty or guarantee is given as to their suitability for any particular purpose or application, and no liability is accepted for any loss or damage arising directly or indirectly from the use of the Company's products irrespective of any information given to us as to intended use of such products. It is therefore recommended that prospective users should test a sample of this product under their own conditions to satisfy themselves that the product is suitable for the purpose intended.
