PHYSICAL INFORMATION

Length (mm)	Width (mm)	Height rear (mm)	Height front (mm)
900	165	65	30
1500			
900	190		
1500			

Typical material density - 2100kg/m³

CUTTING

External Cast Stone Window Sills should be cut with a diamond tipped masonry blade which should ideally be water fed. Once cut, all units should be washed down to remove any excess dust. Due regard should be given to protecting the operative in accordance with current Health & Safety considerations for dust suppression and elimination in the workplace.

Alternatively CMS Danskin Acoustics offer a cut to size service from the manufacturing factory in Wishaw, Scotland.
