

TECHNICAL DATA

REGUPOL SONUS CORE 5

formerly REGUPOL 7210 C

Product

Cost-effective rubber bound underscreed material specifically introduced for the PCT (Pre-Completion Test) market for the isolation of all screed types.

REGUPOL sonus core 5 meets the requirements of Approved Document E (England & Wales), Technical Booklet G (Northern Ireland) and Section 5 of the Building Regulations (Scotland).

Certification

- **Cradle to Cradle Certified®** is a registered trademark of the Cradle to Cradle Products Innovation Institute.
- Manufacturer EPD available upon request.
- Green Circle Certified.

Features and Benefits

- Excellent impact and airborne performance
- Offers long term performance without collapse or “bottoming” out under high point loads
- Minimal creep, even under high loads
- Resistant to ageing and deformation
- Quick and easy to install with no need for separate perimeter strips
- Minimises construction heights
- High quality and exact material thickness guaranteed
- Suitable for use with underfloor heating
- Protects expansion joints
- Mildew and moisture resistant
- When used with a sand/cement screed; there is no requirement to use a DPM
- Manufactured using recycled materials – the proportion of pre and post-consumer content is listed in the products Green Circle Certificate which is available upon request.
- Manufacturing facility certified to ISO 9001, ISO 45001, ISO 14001, ISO 50001

Applications

REGUPOL sonus core 5 has been specifically developed for controlling impact and airborne sound in the following:

- Apartments
- Student accommodation
- Care homes
- Hotels
- Schools
- Commercial facilities

Suitable for both sand/cement and proprietary flowing screeds.
